### InfoStreet Offers Free Turnkey Setup of StreetSmart SaaS Productivity Suite

*The company's so-called "white glove service," valued at \$5,200, enables small businesses to use the software at no charge for 30 days.*

InfoStreet Inc., provider of the StreetSmart suite of Web-based IT productivity software based in Tarzana, Calif., is making available a "Platinum Move In Special" for its SaaS offering. The idea is to enable small businesses to use StreetSmart for 30 days risk free to realize its cost-saving benefits. As part of the package, each potential client will work with a dedicated launch manager.

The StreetSmart solution provides virus and spam protection for email, email archiving, calendar functionality, workflow, CRM, file sharing, knowledge base, mailing lists, portals, Web site publishing, and other functions. The launch manager is charged with creating an immersive StreetSmart experience for potential clients, enabling them to gauge how StreetSmart will reduce costs and improve efficiencies throughout their organizations.

"Often prior to choosing a service, companies compare the monthly prices of one service with another," says Siamak Farah, CEO of InfoStreet. "While this comparison is fairly straightforward, the cost of moving, customizing, and configuring the system to match the company's best practices is hard to evaluate. By offering our highest level of service for free, including turnkey setup, we have eliminated any reason for hesitation, enabling companies to readily and easily reap the benefits of using StreetSmart."

Each customer's dedicated launch manager provides site branding by adding a company's logo, site customization based on company requirements, CRM data setup, migration and settings for all employees, optional mail migration for all employees, admin and end-user training of the system, as well as support for the Web-based applications.

InfoStreet estimates that clients will receive more than a \$5,200 value for free with this special. Once the trial period of 30-days is complete, the StreetSmart solution can cost as little as \$.09 a day per user, according to the company. For more information, visit [www.infostreet.com](http://www.infostreet.com) or call 818-776-8080.
