StreetSmart Webmail Gets a Shine with AJAX

TARZANA, Calif. --(Business Wire)-- InfoStreet Inc. (www.infostreet.com), SaaS pioneer and provider of StreetSmart, a suite of web-based, IT, Productivity and Groupware oriented software applications, today rolled out its latest enhancements which include an Asynchronous JavaScript and XML (AJAX) interface. The new interface will provide users with a marked improvement in speed and a more streamlined user experience. For instance, suggestion boxes will automatically narrow down users' searches as they type; inbound email automatically populates mail Inboxes based on user-specified intervals; navigation and management of email folders have also been enhanced as part of the AJAX upgrade, all pointing to increased efficiency and optimal work experience. In addition, visual enhancements have been implemented to round out the updated offering.

InfoStreet will offer these StreetSmart upgrades at no additional charge to its customers. With InfoStreet's ongoing commitment to Web 2.0 SaaS functionality, StreetSmart's diverse user base will continually receive the latest in applications and tools.

"The beauty of Software as a Service is that our customers always benefit from the latest and greatest technologies, without the burden of software and hardware upgrades," explains Siamak Farah, CEO for InfoStreet. "Our AJAX addition is just the first of several exciting enhancements that our customers will see for this year, moving us one step closer to our mission of having all software run as a service, delivered via the internet."

About InfoStreet

InfoStreet is a Software as a Service (SaaS) provider. Widely regarded as a SaaS pioneer, as early as 1994, InfoStreet began shaping a vision, a team and a technology which is now transforming the way business gets done. InfoStreet fully delivers the benefits of SaaS to tens of thousands through its rich, web-based, IT, Productivity and Groupware oriented software applications.

InfoStreet's SaaS platform, StreetSmart, complete with functions such as Virus and SPAM protected Email, Email Archiving, Calendar, Tasks, CRM, File Sharing, Knowledge Base, Mailing Lists, Portal, Web Site Publishing and more, is fully hosted and managed, enabling it to seamlessly blend with or become any organization's IT infrastructure.
